

Microchip Scanner Program

For Equine Adoption & Rescue Organizations

Overview

The USTA Board of Directors approved this Microchip Scanner Program for equine adoption and rescue organizations to facilitate getting microchip scanners into the hands of equine adoption and rescue groups. The Bluetooth reader will display the horse's microchip number and temperature on the scanner itself. It will also communicate with your phone via the USTA ChipID app (available for free on both the App Store® and Google Play®) to automatically display a Standardbred's basic information, including name, registration number, year of foal, color, and sex.

Requirements

The applying organization must be a non-profit charity per the IRS that is also registered with the state they are located in. A copy of the determination or affirmation letter must be submitted along with this application to verify your non-profit status. You must also provide proof that you are registered with the state.

Application Deadline

There is no application deadline. Scanners are distributed on a first come, first served basis. If all the scanners are distributed for 2026, please check back in 2027 to see if a similar program will become available.

Contact

If you have any questions about this scanner program, please contact Jessica Schroeder at jessica.schroeder@ustrotting.com or call 877.800.8782, x3212.
